

DFG students in the Netherlands: Erasmus+ Project „History and architecture in European cities“

The students participating in the project „European Citizenship (History and architecture in European cities)“ went to the Netherlands, to Gouda (and also Rotterdam) with their three teachers.

The students met their exchange partners for the first time. They had city experiences and learned many things (photography workshop, history of Gouda, urban transformation, etc.), which made them enthusiastic!

The teachers and students thank the Dutch partners again for their warm welcome.
