

Comenius trip to Hungary

The DFG-LFA pupils travelled to Hungary to meet and work with other students from England, Spain, Turkey, and of course Hungary.

The programme was dense with cultural visits, activities and games to get to know each other and workshops around our main Comenius theme, consumption and waste.

The pupils and the teachers have greatly appreciated the hospitality and the warmth of our Hungarian hosts.

But first and foremost, the most important impact on every participant is certainly the sense of community and the long-lasting bonds that were created during this trip.
