

# Erasmus+ on the move

To close the first year of our project « Headlines: More than Meets the Eye », pupils from the French-German High School visited our partner in Greece where they also met students from Spain and Finland.

Apart from discovering Greece and getting to know other cultures, the participants had to compare the stereotypes traditionally attached to the partners in their country, compare the image of the partners in their own media and produce and broadcast a radio programme.

As usual, the meeting left an indelible mark on pupils and teachers alike, giving flesh to what a fruitful European community looks like.
