

Eco-friendly sunscreen - Erasmus+ exchange with Bilbao

A group of Seconde students collaboratively worked with their peers from our partner school IES Txorierri BHI in Derio near Bilbao.

The return visit took place last week in the French-German High School in Saarbrücken.

The objective of the project was to have students work in an international setting on an environmentally-friendly sunscreen.

Europäischen Union**

Under the guidance of Ms Duthoit and Mr Suska, the pupils worked on scientific questions relating to biology and chemistry.

Of course, it was also an opportunity for them to improve their language skills and bond with their peers in Bilbao.
